DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 1. Claims 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Chiussi et al. (US 5,689,506), 'Chiussi" hereinafter.

Chiussi discloses a method for establishing communication paths between a first input/output card and a second input/output card by receiving a signal at the first input/output port cards of input port unit110 that are connected by an internal link 120 to a switch fabric 130 that is, in turn, connected by a link 140 to output port units 140 and connected to the first switch fabric, therefore, establishing a communication path between the first communication channel 120 and second communication channel 140 by the switching fabric 130 (see figure 1, col. 2, lines 27-58). Establishing a connection between the input ports and output ports, via switching fabric, is inherent.

Allowable Subject Matter

2. Claims 1-8 and 15-21 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The closest prior art, as cited above, fails to disclose "an electrical connecter removeably connectable to the first and second printed circuit boards and operable to

Art Unit: 2667

provide electrical communications therebetween, the first and second plurality of output ports being mutually oriented in a common direction".

3. Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- (i) Yang et al. (US 5,856,977) disclose a distribution network switch for large switching architecture that utilizes fewer switching stages therefore saving chip space.
- (ii) Holden (US 5,557,607) discloses an ATM switching architecture of a switch fabric to connect cells received at any of its input ports to any of its out ports.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Afsar M Qureshi whose telephone number is (571) 272 3178.

Art Unit: 2667

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on (571) 272 3179. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
